PRESSING KITS
FOR SMALL, MEDIUM,
AND LARGE FRUITS

DOUBLE COVER

The Double Cover separates the Food Zone from the Engine Zone. It can be removed and cleaned in the dishwasher for improved hygiene and increased efficiency.

CROSS HOLDER

The Cross Holder secures 5 fastening points with one single screw. This saves time, cuts costs, and increases operational safety.

SCS SOFT CUTTING SYSTEM

The Soft Cutting System (SCS) with the Up & Down blade provides a precise cut without tearing the peel. The juice does not get contaminated with excessive bitter peel substances.

TRANSPORT SYSTEM (ATS/MTS)

Both, the Automatic Transport System (ATS) and the Manual Transport System (MTS) help keep the sieve free of pulp and seeds. Without having to remove it, the sieve can be cleaned with a single swipe (MTS) or automatically (ATS).

INTELLIGENT STOP

This feature provides the freedom to program the machine to stop when a certain amount of fruit has been pressed and the peel container should be emptied. An acoustic signal sounds and the machine stops automatically.

PRESSING KITS

Three different pressing kits (optional) allow you to press fruit sizes ranging from 50 to 90 mm (1.96 to 3.50 inches) in diameter for juicing lemons, limes, tangerines, oranges and grapefruit.

CAPACITY SELECTION

If required, the machine can be modified from pressing 40 fruits per minute to 50 or 60 fruits.

STAINLESS STEEL

All our machines are made of food-grade stainless steel. This means improved hygiene, outstanding product safety, and excellent value retention.

ABSOLUTE SAFETY DUE TO OUR 2-ZONE-TECHNOLOGY

[ENGINE ZONE] [FOOD ZONE]

Safety is our first priority.

Citrocasa's 2-Zone Technology, the complete separation of Engine Zone and Food Zone, allows for quick and easy cleaning of all the parts that come into contact with the juice. The results are increased hygiene, safety, and time saving.

[ENGINE ZONE]

The Engine Zone does not come into contact with the juice during the pressing operation. This greatly reduces machine-cleaning times.

[FOOD ZONE]

The Food Zone components, which come into contact with the juice during the pressing/juicing operation, can be removed from the machine and cleaned in the dishwasher. This saves time, cuts costs, and increases hygiene and safety levels.

CROSS HOLDER

Fast disassembly and increased operational safety

Easy disassembly.

Our patented Cross Holder secures 5 fastening points with one single screw. The pressing and cutting elements can be disassembled for cleaning and reassembled again in a matter of minutes.

TIME SAVING

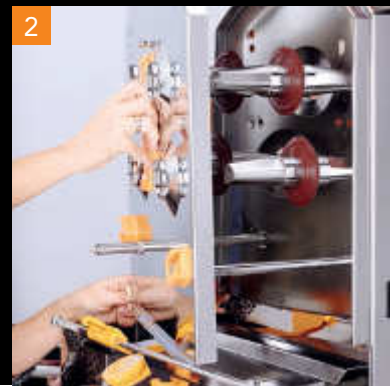

PROFITABILITY

OPERATIONAL SAFETY

1

2

DOUBLE COVER

Enormous time saving
Highest hygiene and safety levels

Fast and effective cleaning.

The Double Cover is the key component of our 2-Zone Technology. All Food Zone parts, including the back wall (Double Cover) can be removed for cleaning, making the juicing operation extremely hygienic, safe, and efficient.

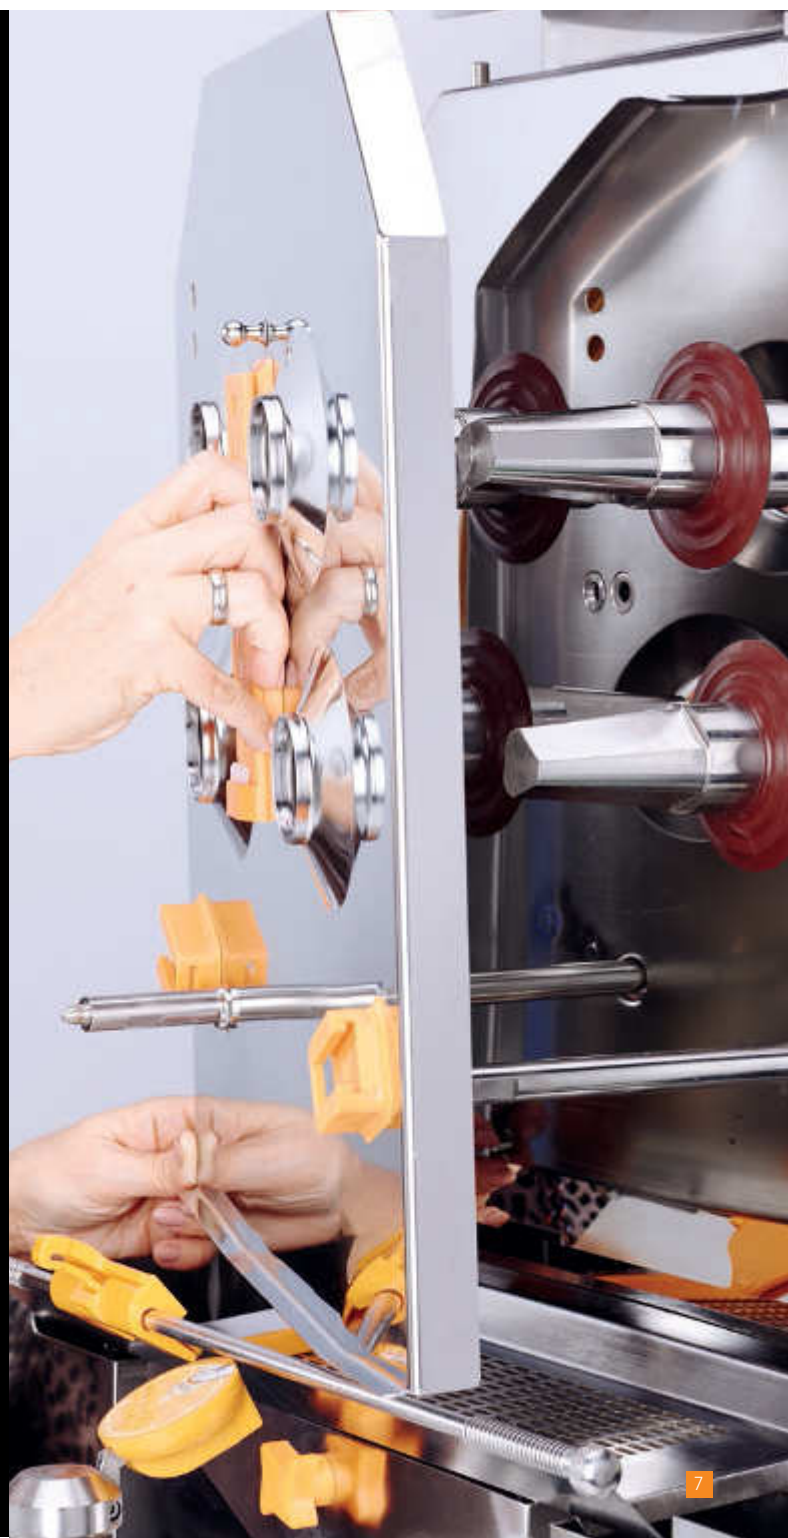

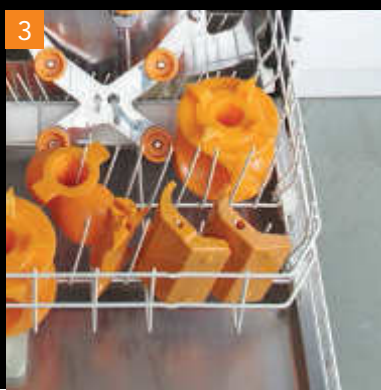

TIME SAVING

PROFITABILITY

HYGIENE

INTELLIGENT STOP

Increased operational safety and hygiene

Safety is a question of intelligence.

The programmable auto stop indicates when the peel bucket should be emptied to help avoid peel jams and juice contamination. It can be set for different peel bucket and fruit sizes.

PRESSING KITS

Flexibility and variety

For small, medium,
and large fruit.

Citrocasa offers the option to equip its 8000 Series machines with different pressing kits, allowing you to use fruit from 50 to 90 mm (1.96 to 3.50 inches) in diameter. You can press a variety of citrus, such as lemons, limes, tangerines, oranges, or grapefruit and maintain the same high juice quality for all.

SAFETY

TRANSPORT SYSTEM (MTS/ATS)

Time saving, hygiene, and
the highest juice quality

MTS Manual-Transport-System

ATS Automatic-Transport-System

Hygiene and time efficiency.

The ATS (Automatic Transport System) and MTS (Manual Transport System) help keep the sieve clean of seeds and pulp without having to remove it. The Transport System greatly reduces labor, cuts costs, and maximizes hygiene and juice quality.

TIME SAVING

SCS SOFT CUTTING SYSTEM

Highest quality, best taste

Only a perfect cut can ensure highest juice quality.

Thanks to our SCS Up & Down Soft Cutting System, the juice from a Citrocasas 8000 is very pure. Precise cutting means that the peel doesn't tear and the juice doesn't get contaminated with bitter peel oils and substances. The result is simply pure fruit goodness.

HYGIENE

OPERATIONAL
SAFETY

The perfect equipment for you and your customers.

Keep your customers coming back for more with the best-tasting juice and the highest speed available. No produce or fresh-cut department should be without a Citrocasea 8000. With a pressing capacity of 40, 50, 60 fruit per minute, a bottle of juice can be filled in seconds.

The optional pressing kits will give you added flexibility and allow you to press fruit sizes ranging from 50 to 90 mm (1.96 to 3.50 inches) in diameter. Thanks to our 2-Zone-Technology, the Cross Holder and the Double Cover reduce cleaning time to a minimum.

CITROCASA 8000 XB ADVANCE

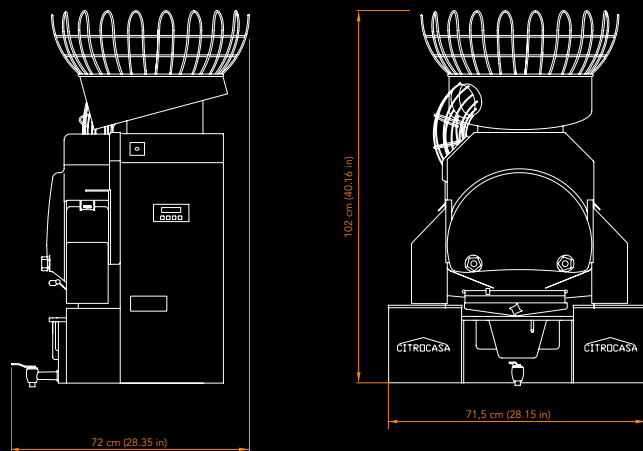

Juice tank for even more convenience.

Ideal for highly frequented establishments and staff-operated juicing.

The ideal juicing solution when you have to press larger quantities of juice in advance. The juice is pressed into the juice tank with a capacity of approx. 5 liters (1.3 gal.)

- High-capacity stainless steel fruit hopper and rotation plate for 21 kg (46.2 lbs) of oranges
- Large digital display with counter for squeezed fruits
- Programming quantity of fruits and On/Off operation
- Ideal for Stand-Alone-Solutions
- SCS Soft Cutting System for superior tasting juice
- Double Cover and Cross Holder for fast and easy cleaning
- The MTS (Manual-Transport-System) to keep sieve free of seeds and pulp
- Intelligent stop for improved peel management

CITROCASA 8000 SB-ATS *ADVANCE*

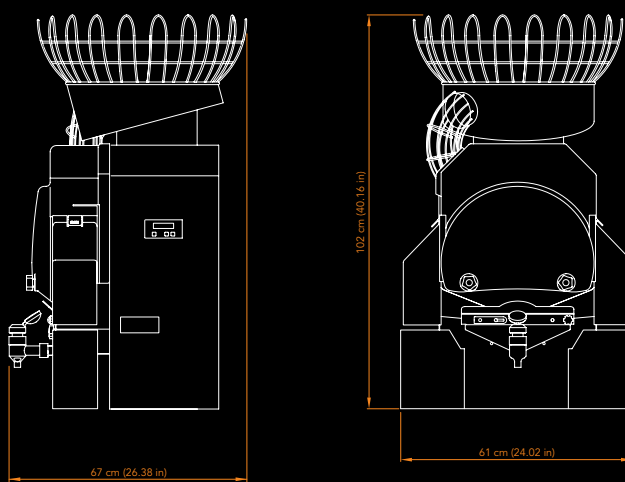

The ultimate in self-service.

Uninterrupted pressing of superior quality juice.

The Citrocasa 8000 SB-ATS Advance with its Automatic Transport System (ATS) sets completely new standards in terms of user-friendliness and automation. Ideal for highly frequented self-service operations.

- High-capacity stainless steel fruit hopper and rotation plate for 21 kg (46.2 lbs) of oranges
- Simply pressing the SB-tap automatically triggers the ATS system along with the juicing action
- The ATS system continuously removes filtered peel, pips and excess pulp from the juicing area
- Ideal for Stand-Alone-Solutions
- SCS Soft Cutting System for superior tasting juice
- Double Cover and Cross Holder for fast and easy cleaning
- Intelligent stop for improved peel management

CITROCASA PET BOTTLES

Great-tasting juice on the go.

250 ml

330 ml

500 ml

1.000 ml

Optimised shelf life for a perfect juice experience

- Citrocasa PET bottles for optimal juice freshness and shelf life
- Optimised bottle opening for drinking and enjoying while on the go
- Pressure resistant form with flexible bottle bottom
- Dispenser compatible
- Highest hygiene thanks to delivery with fitted bottle cap

Optional accessories for high adaptability.

1 Stainless Steel Cabinet

The Stainless Steel Cabinet turns your Citrocasa 8000 into the perfect solution when you need mobility and want to leverage your juicer's pressing capacities to the fullest.

2 Countertop Installation Kit

With the Countertop Kit you can integrate your juicer into your counter. For this, the counter has to be cut to allow the peels to fall into a waste bucket placed underneath.

3 Bottle Dispenser

Keep your bottles handy with the optional bottle dispenser.

7 MTS Retrofit Kit

The MTS (Manual Transport System) keeps the sieve clean of seeds and pulp without having to remove it. Your 8000 Classic can be retrofitted with this feature.

8 Pressing Kits

Citrocasa offers the option to equip its machines with different pressing kits (pressing elements, peel ejectors, knife, fruit supply tunnel) for small, medium, and large citrus fruit 50 to 90 mm (1.96 to 3.50 inches).

9 Shop In Shop System

Modular juice island concept for supermarkets, shopping malls, etc.

4 Glass Display

Available as 2- or 3-level design. Includes safety glass and stainless steel countertop.

5 Tray Slide

Ideal for self-service and cafeteria-style setup. 81,5 cm x 28,5 cm / 32.1 x 11.2 in (W x D).

6 Stainless Steel Pedestal

Ideal for tabletop machines. The pedestal raises the machine, allowing you to place a container below the tap.

10 Crushed Ice Display Cabinet

The crushed ice cabinet is an attractive option to display your pre-filled bottles and keep them chilled.

11 Coin System

This additional device can be installed on each of our machines on request.
